HOW TO READ AND VIEW THIS DOCUMENT

The pages that follow are mostly color images and text boxes, with a few “report pages,” which have denser text, followed by some endnotes.

This PDF booklet was created and formatted specifically to be legible when read and viewed on small screens and smart phones.

Most of the images are in sets, often changing subtly from page to page; sequential viewing might benefit your understanding.

The proposition that if intelligence is the ability to recognize patterns, then we ought to make patterns reognizable!

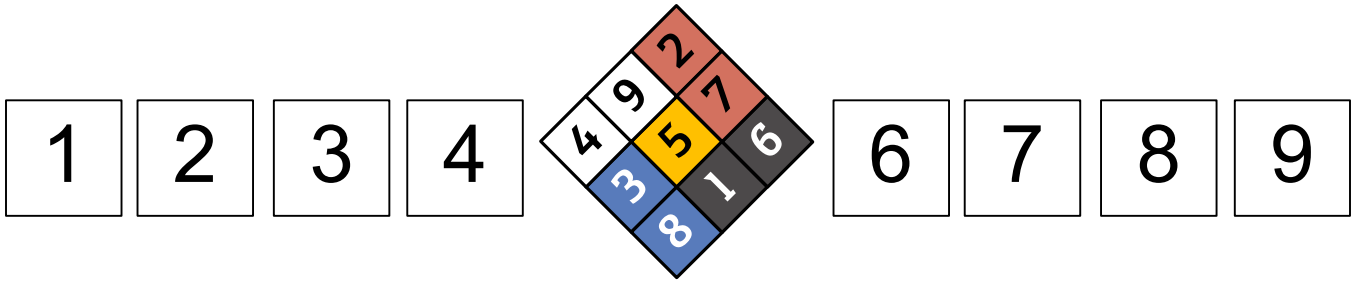
Question:

How do you propose to “make patterns more recognizable?”

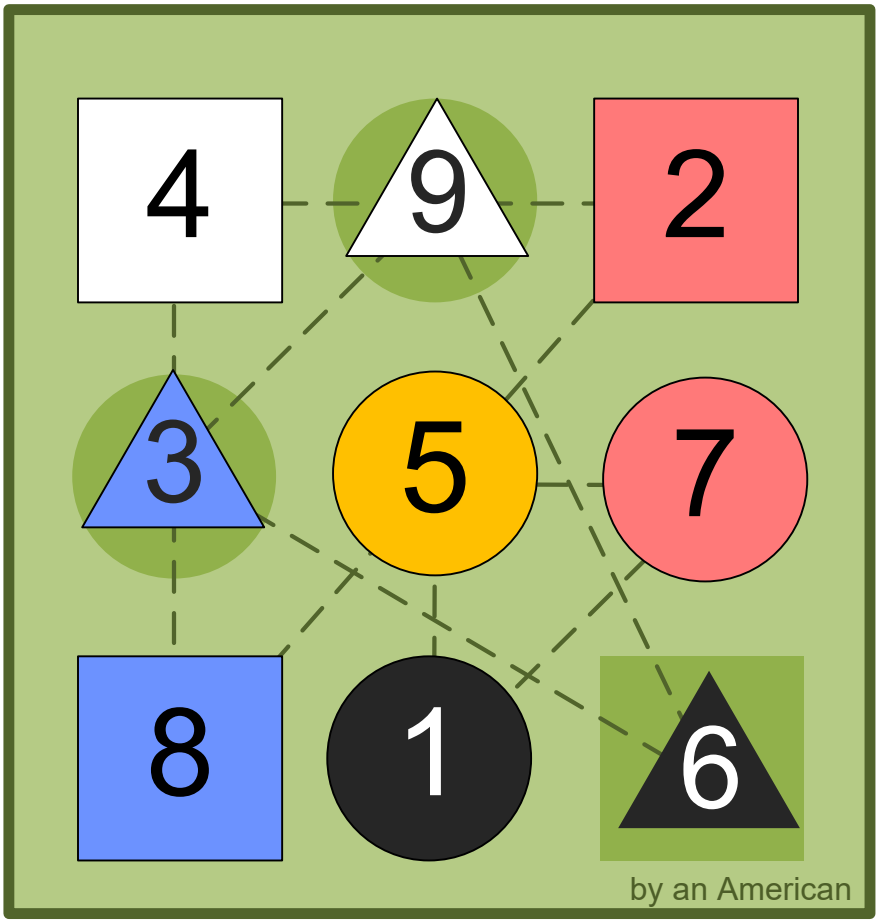
Answer:

I will show you what your government school never revealed to you. Then you must wonder why (((they))) would hide something so crucial from you!

Lo Shu Color Scheme: Matrix of the Nine Digit Roots



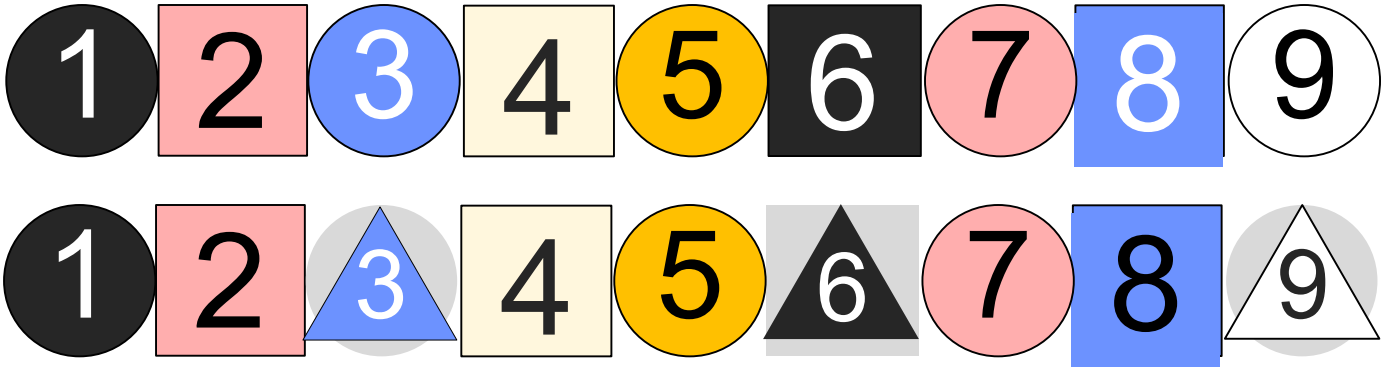
The 3x3 Magic Square of Saturn

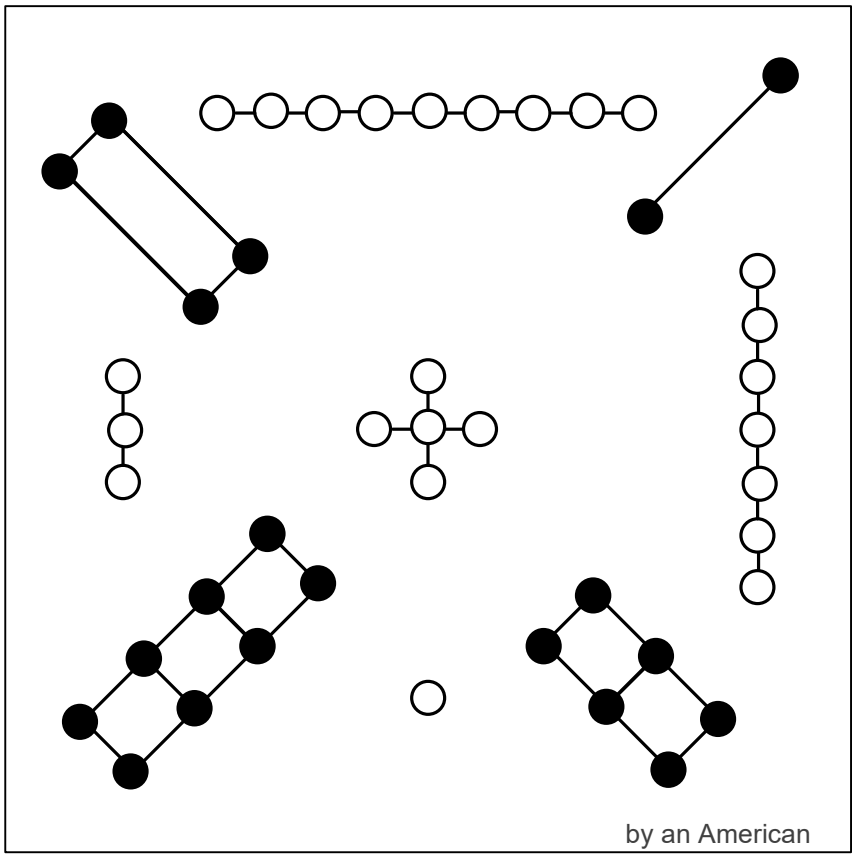


"Alle Dichotomien sind falsche Dichotomien."

THE LAW OF THREE, EXPRESSED BY THE BASIC 3X3 MAGIC SQUARE

Showing the Odd, Even & Trine Digit-Roots

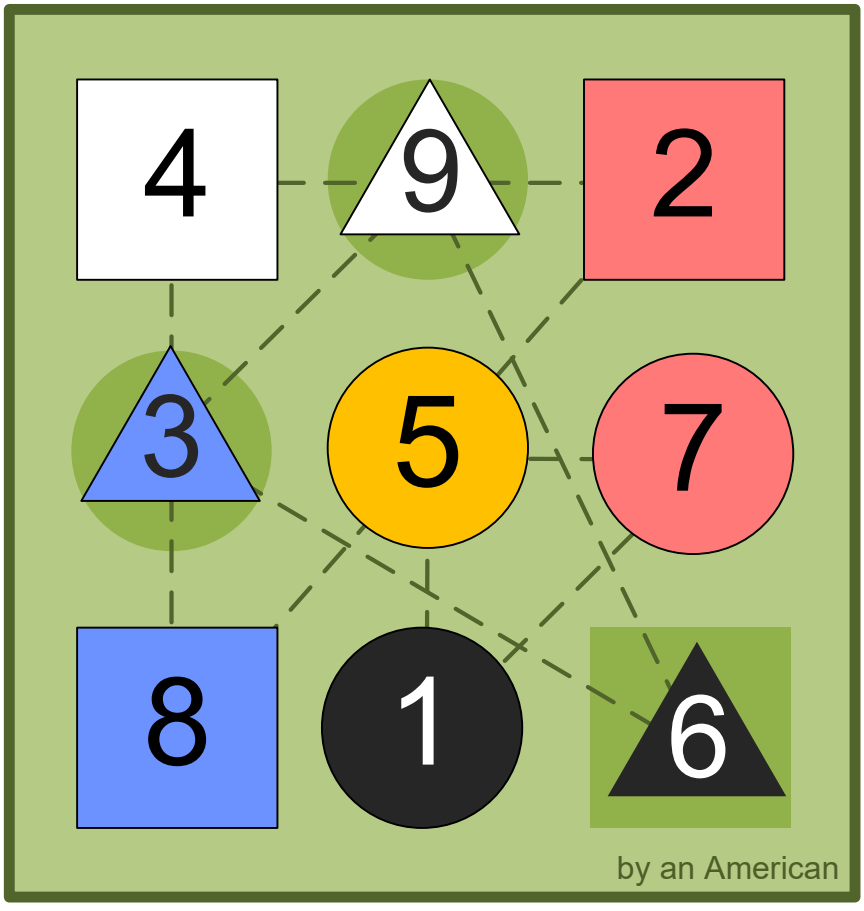




This is an ancient Chinese representation of the 3x3 Magic Square, known to them as the Diagram of Lo Shu. It is a Matrix that holds the nine Digital-Roots.

These Dot Numerals, were not real useful for doing even simple arithmetic.

The Arabic numerals below show the colors* that the Chinese Taoists attributed to each digit root.



You can see how Arabic numerals are a vast improvement over using the older, clunky Dot Numerals.

Left: the up-to-date Aryan version of the Lo Shu, **revised to show the Trine numbers** as well as the Even and Odd numbers of the set of Digit-Roots. Note the dark shadows behind the Trines.

.

Question:

But I am White! What should I care about something that some Chinaman made up?

Answer:

Because the Chinese have never invented anything. Their ancient "Yellow Emperor" was called that for a reason. **Hint: not for the color of his skin!** Let's move forward.

Question:

Why are Trines important; some of them are Even and some of them are Odd; What's with that?

Answer:

Trines are important because they are a part of reality, equal to Odd or Even. Trines give us The Law of Three, helping you avoid False Dichotomies!

Question:

False Dichotomies; what are those?

Answer:

False Dichotomies are dangerous mental traps that hinder you by preventing or ruining understanding. Many are created by The (((People))) of the False Dichotomies.

False Dichotomy?

All Dichotomies are False Dichotomies.

THE LAW OF THREE WILL HELP YOU UNDERSTAND!

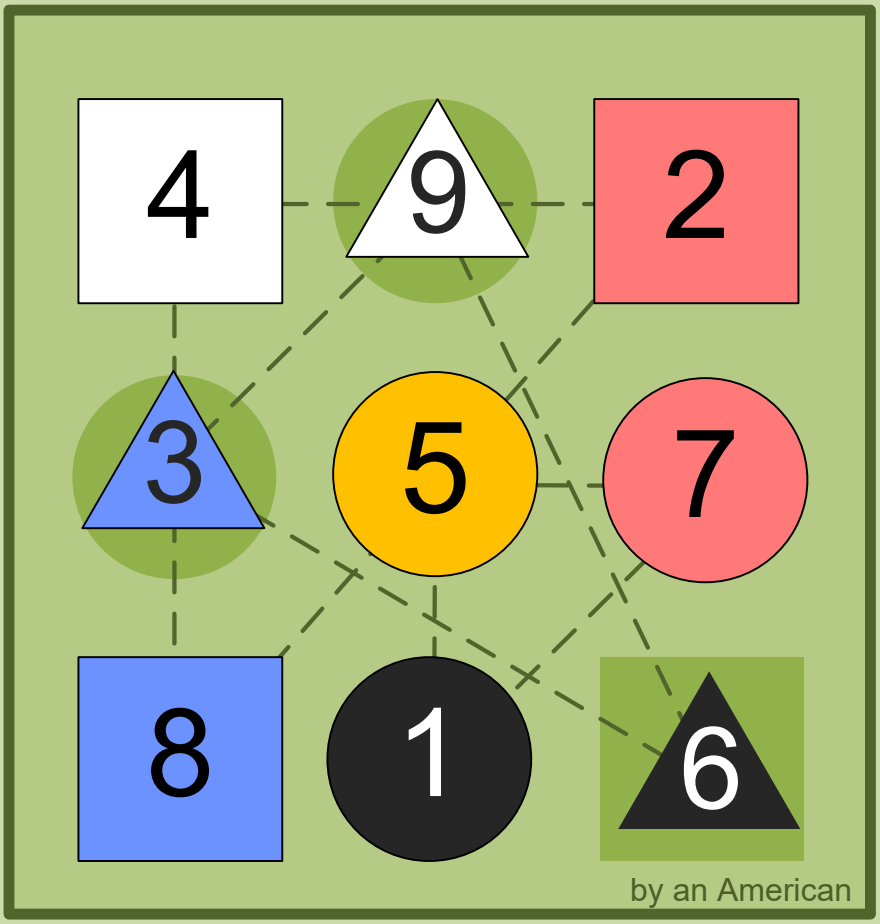
Question:

Can you give me an example of a False Dichotomy that is remedied by Trine Numbers?

Answer:



“Alle Dichotomien sind falsche Dichotomien.”

Odd is Capitlism
Even is Communism
Trine is **National Socialism!**

Question:

Will you explain?

Answer:

Let’s let a famous Australian National Socialist explain!

Austrailian, Thomas Sewell
on NS vs. Communism vs. Capitalism

"Let me explain Capitalism, Communism and NationalSocialism for you."

The first thing I notice about Communists, is that they are useless and lazy people. Communism rewards and therefore produces a useless and lazy population.
Communists at their core put sharing above function. They don't care how dysfunctional their society is, as long as everyone equally shares the poverty.

The first thing I notice about Capitalists, is that they are useful but selfish people. Capitalism rewards and therefore produces a useful but selfish population who will are willing to betray each other for more money. Capitalists at their core put money above the Race. They don't care how physically, morally or spiritually unhealthy everyone is, as long as they make money.

Both of these forces are destroying the White Race.

Hitler envisioned Nationalsocialism as a new ideal, a useful and selfless population. One that rewards useful people with an in-group free market; on the condition that you do not gain at the social, moral, spiritual expense of others.

Boomers, Q-tards and room temperature IQ conservatives, see the world Social in Nationalsocialism and assume it means marxist communism, when it couldn't be further from reality.

Austrailian, Thomas Sewell
on NS vs. Communism vs. Capitalism

(Continued from the previous page)

Hitler hated that the jews had distorted what he considered "The folkish principle", the idea of being 'Pro-Social' (as opposed to Anti-Social). To him the word Social, meant to put the tribe first and personal gain second [not last!]. As opposed to Marxist Communism, which was to put the international 'downtrodden' first, and the Race and personal gain equal last.

Many get hung up on the word Social, but again it was Hitlers vision to reclaim the word.
Just as we are trying to reclaim Feminine from Feminism.
Nation means Race/Folk and Social means Society.

So NationalSocialism just means to build a FolkishSociety.
A Society of the Folk.

If your boomer family member or q-tard friend is still confused, explain it this way: Its more or less the same economy as what we already have, except no pokie machines, onlyfans, jewish drug companies, jewish military industrial complex, jewish banking usury, jewish media etc.

You can make money, you just can't make money by poisoning and enslaving people. Also known as; being jewish.

Question:

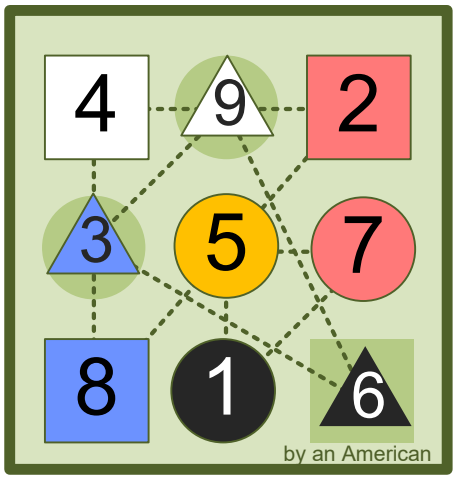
Wow! This Aussie makes NS sound like The American Way! Can you explain how that green 3x3 square with the colored numbers fits in?

Answer:

Yes, National Socialism shares attributes with The American Way. You might read John Jay(5). Now for that green numbered square:

Capitalism, Communism, and National Socialism

How they Relate to the 3x3 Magic Square and the Law of Three. *by an American* ***PART I***



The **Odd** Elements represent
CAPITALISM
The **Even** Elements represent
COMMUNISM
The **Trine** Elements represent
NATONAL SOCIALISM

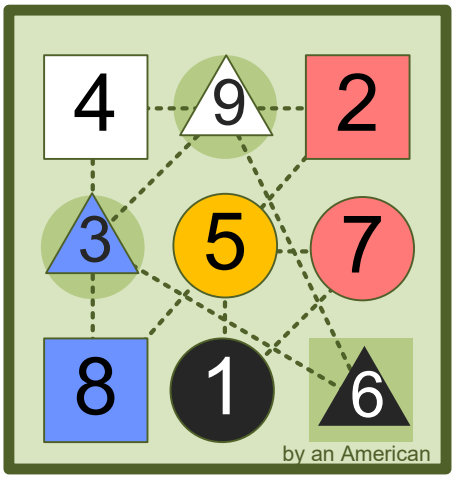
The first thing to notice is the shapes. Even Numbers occupy Squares, Odd numbers occupy Rounds, and "Trine" numbers occupy Triangles. This creates three Triads: Even, Odd, Trine.

Next you notice that there are four number pairs: 9 and 4; 3 and 8; 1 and 6; 7 and 2. There is **one single, central number:** 5. **The five Odd numbers form a central cross**, around which the four Even numbers fill in the corners.

The Odd and Even sets each contribute to form the Trine set. Odd contributes <u>two</u> elements: 9 and 3. Even contributes <u>one</u> element: 6. Thus, you might think that things are not balanced because not only is the Trine set "strange," but the Odd and Even sets are not quite "opposites." Well, as we know, when you add two Even numbers, the sum is Even. And when you add two Odd numbers, the sum is also Even. But when you add an Even and an Odd number, the sum is Odd. So this is not new. Have you ever wondered about that addition quirk?

Capitalism, Communism, and National Socialism

How they Relate to the 3x3 Magic Square and the Law of Three. *by an American* ***PART II***



All three sets, Odd, Even, and Trine, form large Triangles upon the diagram. **Odd and Even are Right Triangles,** with Odd running Clockwise: 1, 5, 7; and Even running Counter-Clockwise: 2, 4, 8.

The Odd Triangle cuts the central 5 by one quarter; the Even Triangle by half.

The Trine Triangle does not bisect the central 5. It "owns" the whole thing. The Triangle formed by the three Trine numbers is not a Right Triangle. This is a special triangle with two 72 degree angles and one 36 degree angle. (72 + 72 + 36 = 180.)

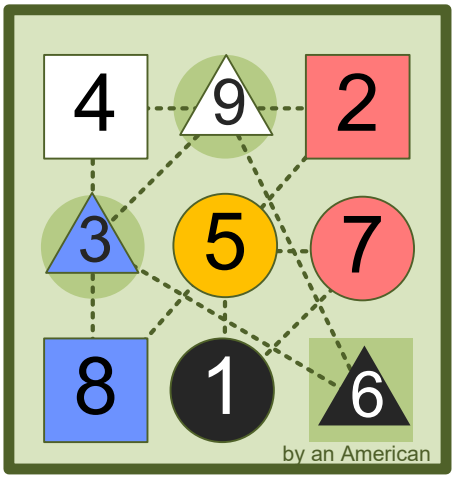
The Trine Triangle is one point of a Pentagram: five-point star. Thus while the Odd and Even sets of digit-root elements differ, **the Trine set is even more dissimilar.**

The next thing to understand is that the Odd numbers are said to have masculine attributes and the Even numbers to have Feminine properties. You may want to think about that. The important thing here is that the Trine Triangle consists of two Masculine (Odd) numbers and one Feminine (Even) number.

All of the above is but a lead into thinking about what the three sets and the nine root-digits represent in the discussion of Communism, Capitalism, and National Socialism.

Capitalism, Communism, and National Socialism

How they Relate to the 3x3 Magic Square and the Law of Three. *by an American* ***PART III***



The idea that this small diagram of twelve elements can express the differences, similarities, and overlaps in social or political philosophies may seem spurious, but if you read the two preceding pages carefully, you've seen that the diagram is quite complex, once you delve into all of its features.

This diagram "busts" a false dichotomy: that Capitalism and Communism are polar opposites, so a "Third Way" is impossible since a "mixed economy" will be a "mish-mash" or hotch potch.

Pop Quiz: Is Water a "mixture" of Hydrogen and Oxygen? Answer: No.

Of course, those political systems are two wings of one "bird," owned and operated for the benefit of one group of parasites. With them running the show, an "alternate" system that would contain elements of both of the others really would be a fraud -- similar to "mixing" up snake oil from what have you.

However if one is sincere and understands "chemistry," by combining precise amounts of ingredients, in the proper manner, along with a "reagent" and "energy," a new "compound" may be formed by "chemical reaction." This new product will have as little in common with its individual ingredients as water (H_2O) has with Oxygen (O_2) and Hydrogen (H_2). Faulty procedure may result in Hydrogen Peroxide (H_2O_2).

More about this in a few pages, if you can wait!

Question:

Now that you've cleared that up, can you show me how colored and shaped numbers can make patterns more recognizable?

Answer:

Of course! Take a look at the 5x5 Magic Square, known as the Magic Square of Mars. Check it out, in all it's splendor and glory!

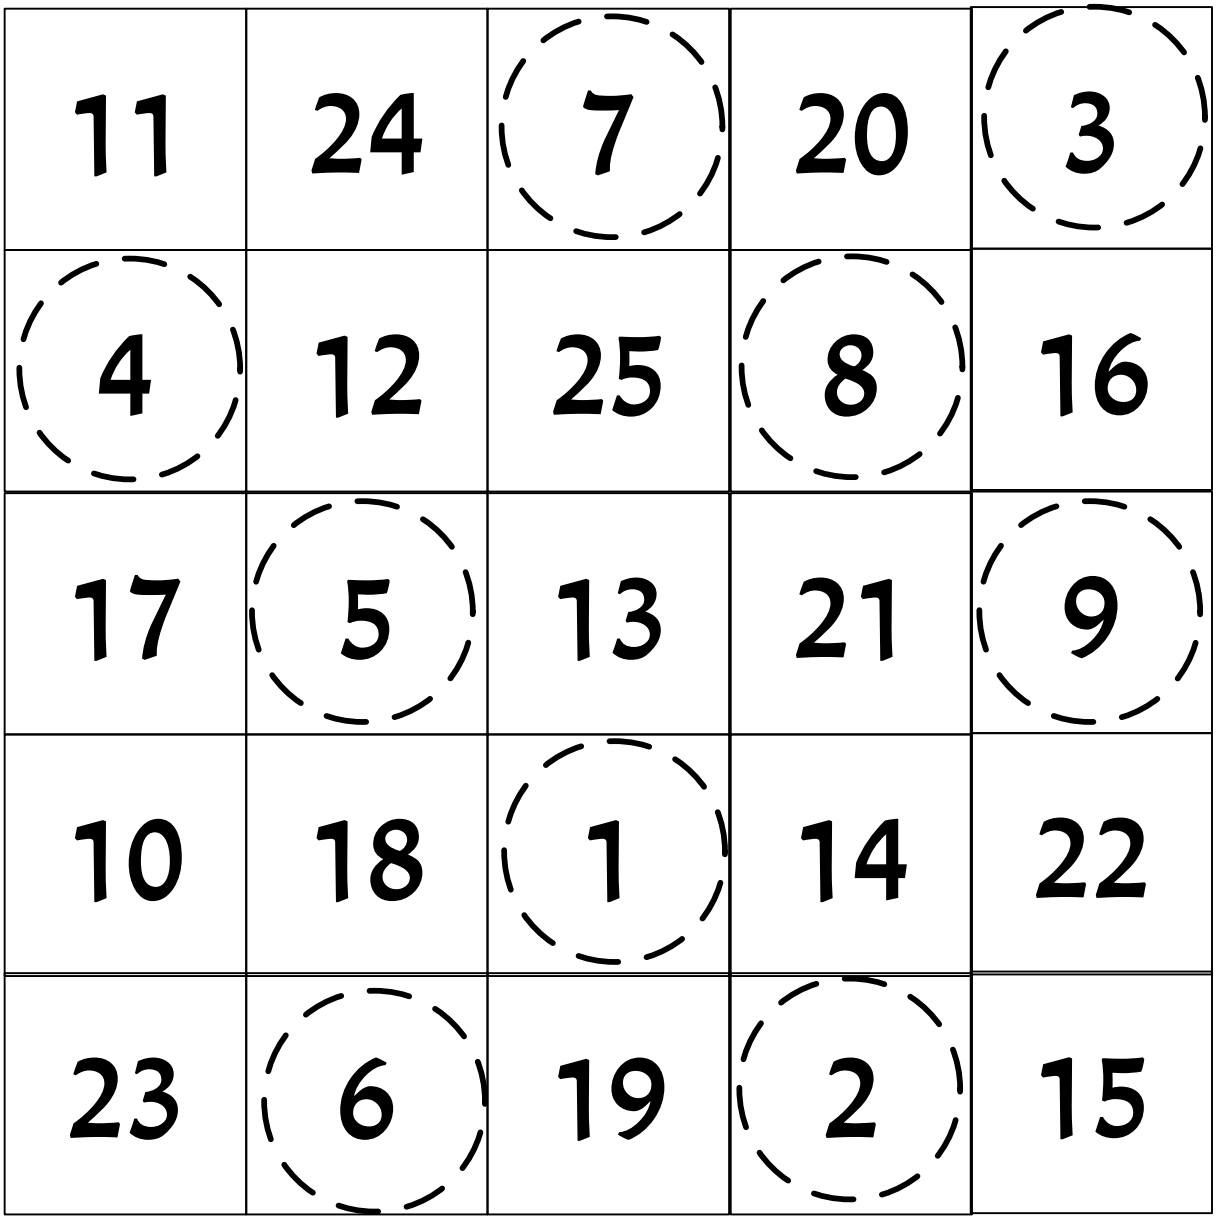
What do you think?

11	24	7	20	3
4	12	25	8	16
17	5	13	21	9
10	18	1	14	22
23	6	19	2	15

by an American

Not very exciting, is it?
Do you see patterns?

See what you can do with the color system.



by an American

First, locate all nine root-digits.

Color them per the color scheme diagram.

by an American

Patterns are already easier to recognize!

Here are some easily recognized patterns:

- 1 and 6 lie on adjacent rows and columns.
- 2 and 7 lie on adjacent columns.
- 3 and 8 lie on adjacent rows and columns.
- 4 and 9 lie on adjacent rows.
- All rows and columns are occupied.
- 4 and 1 sit alone on their row or column.
- 4+1 = 5 and they bracket 5, diagonally.
- Other rows and columns each hold two digits.
- The top-to-bottom diagonal is empty.
- The 3-8 and 7-2 columns interpenetrate.
- The 1-6 and 4-9 rows do not interpenetrate.

Please check again and confirm these patterns.

We have not accounted for the Square's other cells. Let's color them.

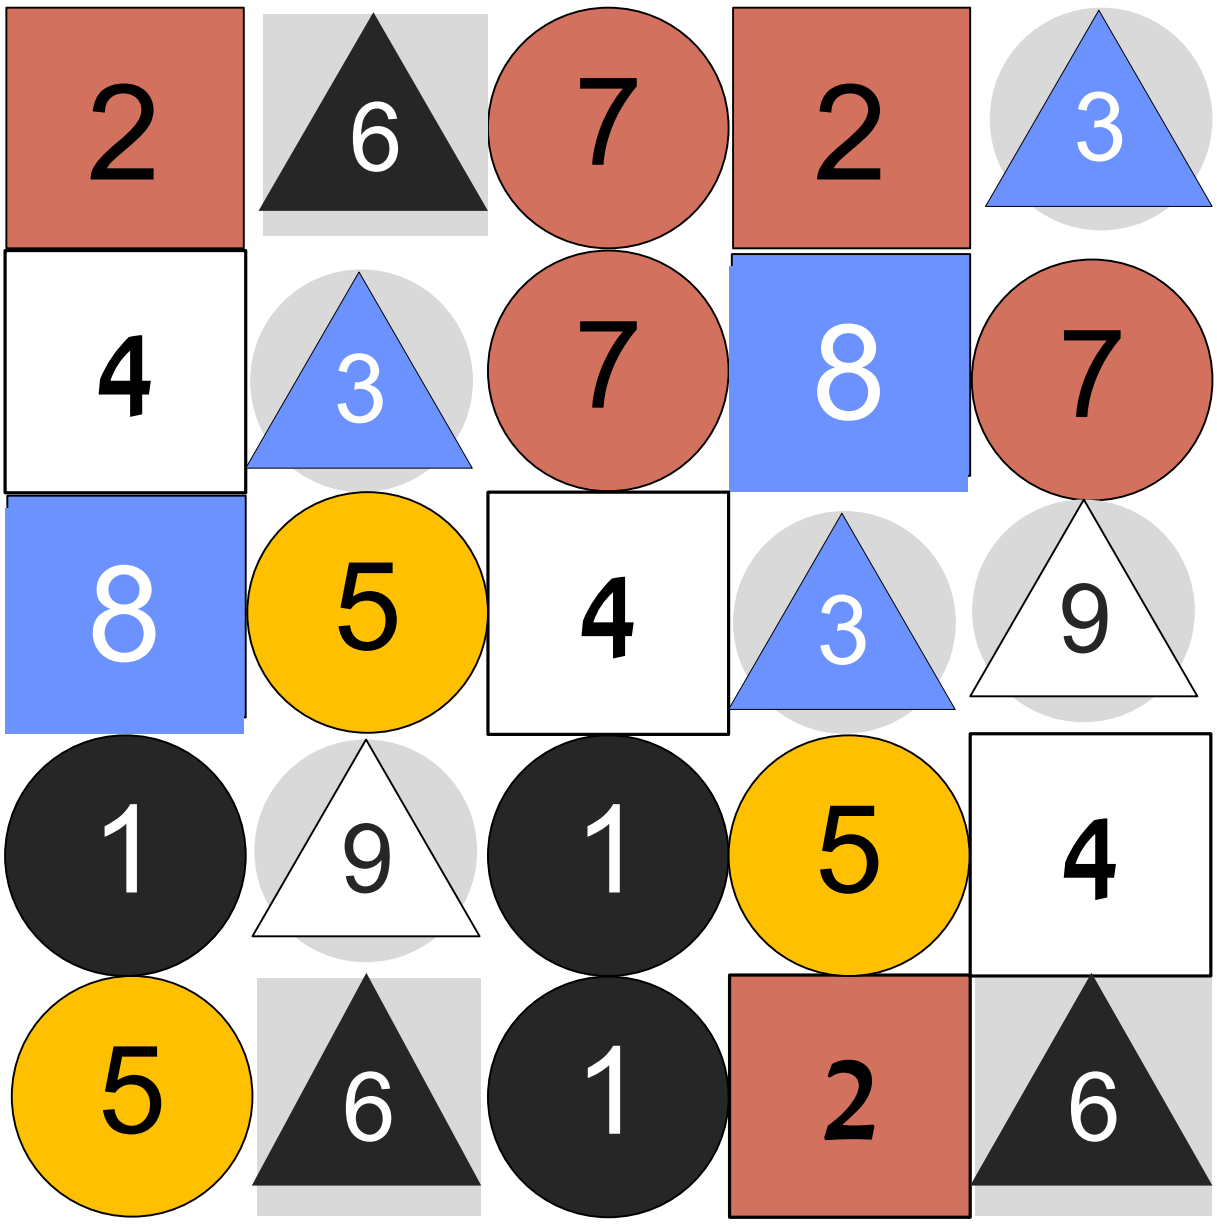
What determines the color of each cell?

11	24	7	20	3
4	12	25	8	16
17	5	13	21	9
10	18	1	14	22
23	6	19	2	15

by an American

Cell are colored according to digit-root. See any remarkable patterns? Maybe we need to see Odd vs. Even.

We need to see Odd, Even, and Trine!



by an American

Analyze a Digit-Root version of the Magic Square of Mars; search for patterns of the type we saw before.

Once again, easily recognized patterns:

- There are three of 1,2,3,4,5,6, and 7.
- There are two 9's.
- There are two 8's (88!).
- There are eight Trines.
- Every row contains one or more Trines.
- Two columns contain no Trines.
- Three columns contain Trines, evenly distributed, top to bottom.
- _____
- _____
- _____
- _____

Can you find any more patterns?

What patterns do you see if you count Trines as Odd or Even?

Question:

These patterns are vaguely interesting, but not especially exciting. Doesn't this Magic Square have anything more sensational?

Answer:

Think again, grass-hopper. Small patterns are relevant because by learning to notice small things, you will learn to connect dots and recognize the Big Pictures in the world! However, the Magic Square of Mars does have one sensational pattern, as you term it.

First, learn to build this Magic Square.

11	24	7	20	3
4	12	25	8	16
17	5	13	21	9
10	18	1	14	22

To learn the secret of constructing an <u>odd</u> number magic square, follow the path of digit roots (4).

URGENT:

Be sure that you understand how this square is built before moving on. Study the diagram and footnote. This is one of the major patterns, since a magic square <u>is</u> a pattern!

Now, then...

Let's add the numbers.

Numbers added: the Magic Square of Mars!

11	24	7	20	3

Can you find the amazing pattern?

All Prime Numbers reside upon the arms!

11 P	24	7 P	20	3 P
4	12	25	8	16
17 P	5 P	13 P	21	9
10	18	1	14	22
23 P	6	19 P	2 P	15

by an American

But there is one little problem.

When the Swastika is spinning “backwards,”

P 11	24	P 7	20	P 3
4	12	25	8	16
P 17	P 5	P 13	21	9
10	18	1	14	22
P 23	6	P 19	P 2	15

by an American

prime number ‘2’ is no longer on an arm!

BECAUSE:

Two is the only Even prime number, and Even numbers are... Female!

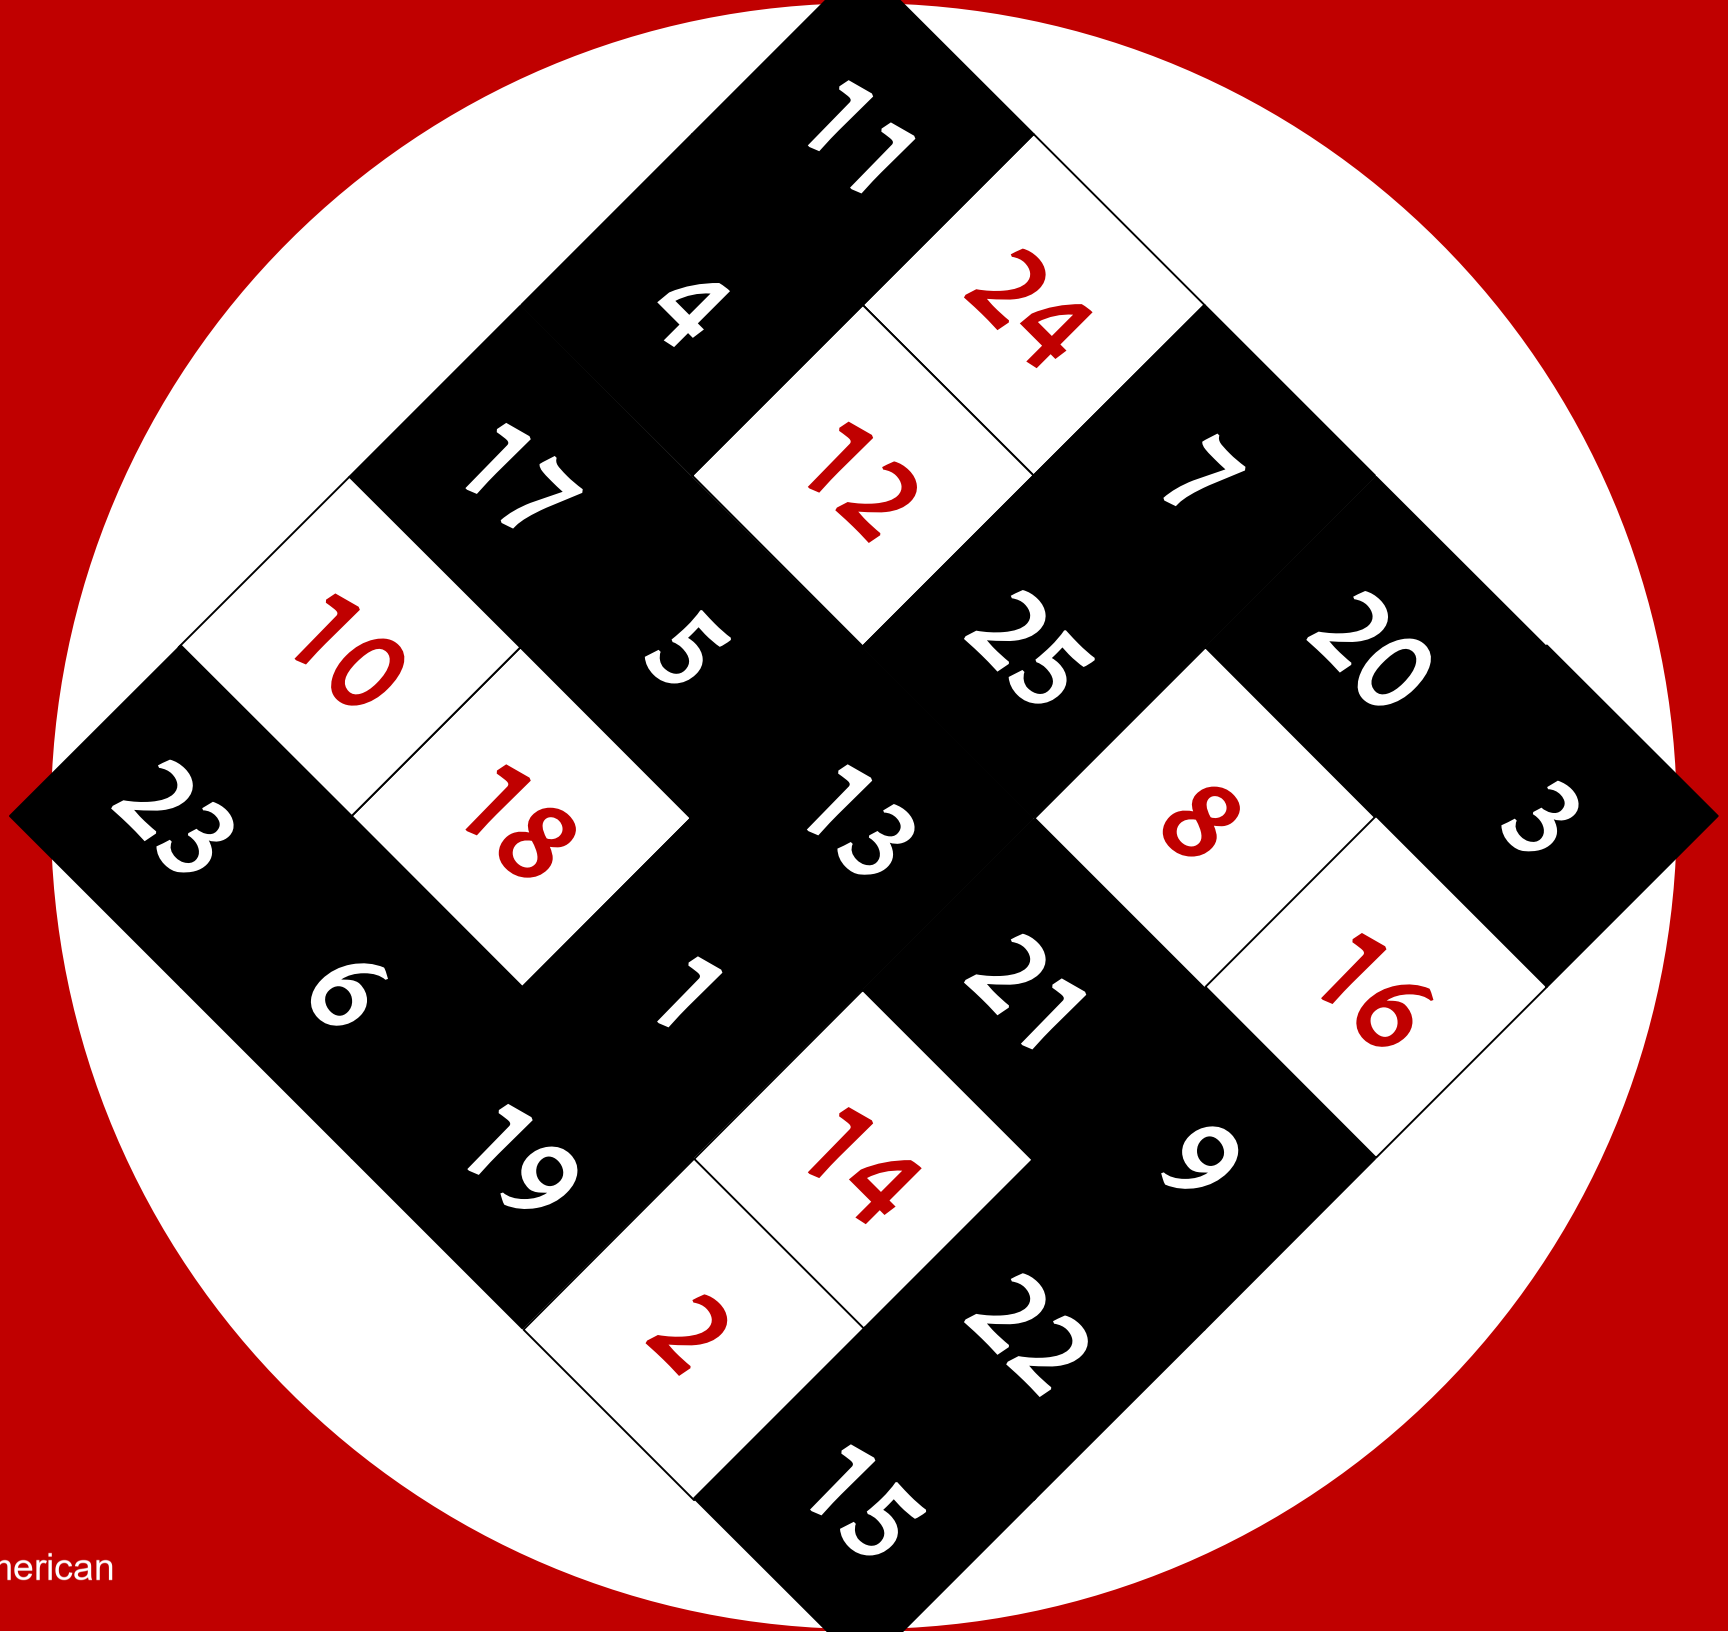
Women sometimes complicate things!

Another Pattern:

The digits in all cells equidistant from the center total ‘8.’

Eight is the Hth letter of the alphabet.

Hail Victory!



by an American

Question:

SEIG HEIL! What else can you show me about the Swastika on the Magic Square of Mars?

Answer:

I will show you this, though it's not really on the Mars Square; it is on the 5 x 5 Swastika Grid.

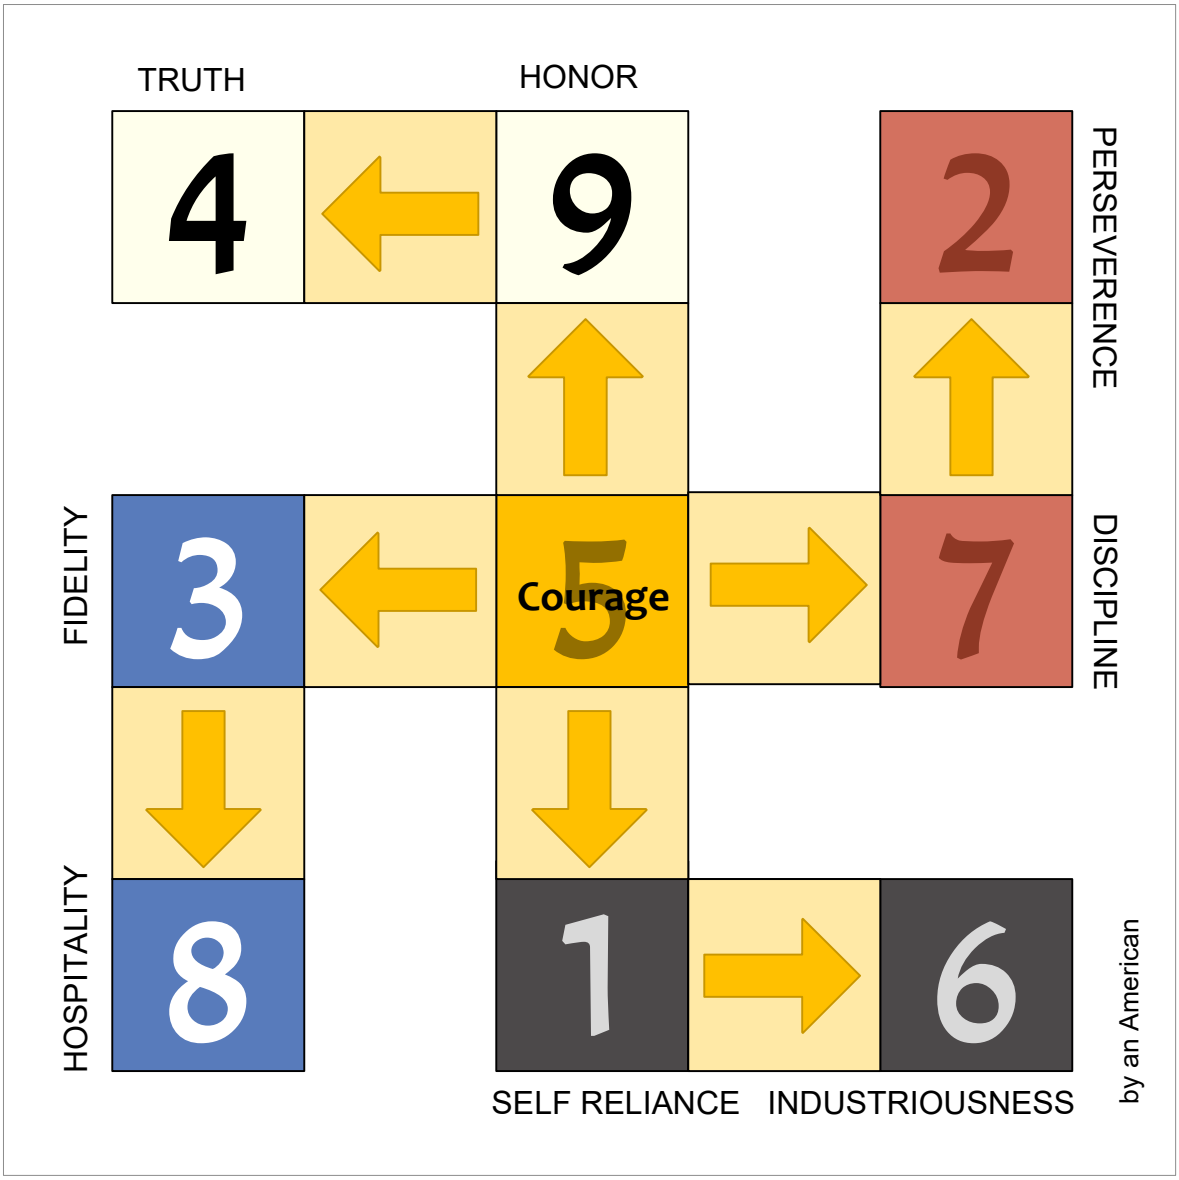
These are the "BEHAVIORAL PARTS OF SPEECH" of the White Race.(5)



DEVELOPMENT OF THE NINE NOBLE VIRTUES:

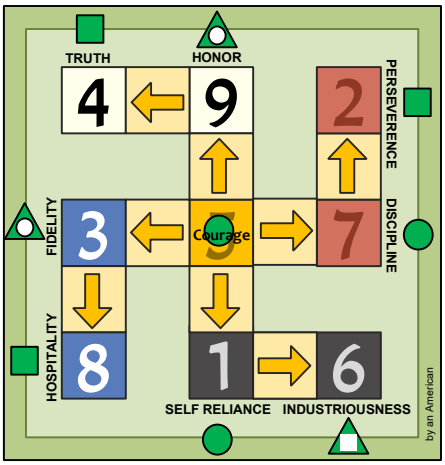
THE NINE VIRTUES

The Law of Three And the 3x3 Magic Square

by an American

PART IV



The two diagrams above illustrate how if one understands the laws of **"Chemistry"** (or Alchemy?) one may produce a **"Chemical Reaction"** combining **"Elements"** that by themselves are less-then-useful, awkward, or even poisonous, into a new **"Compound"** that retains few or none of the objectionable, negative, or unwanted properties of its precursors.

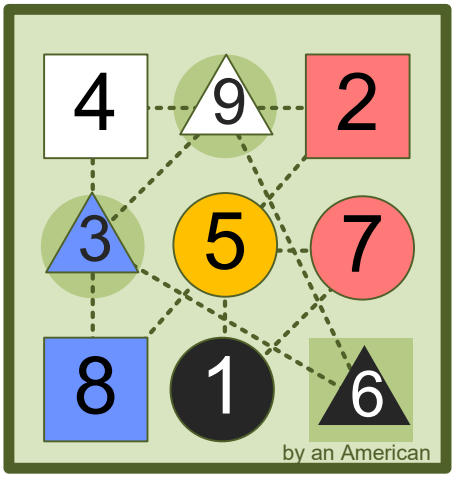
The example given earlier was combining Hydrogen and Oxygen into Water – an analogy of the highly contested so-called "Third-Way" between Capitalism and Communism -- both of which are and have always been owned and operated by the World Parasite – despite what the naïve have believed.

This is important to know because in recent years the secret was revealed, as "Capitalism" more and more began to resemble "Corporate Communism," corrupting governments world-wide: national, state, and local. Of course, so-called "World Government" in all of its existing functions has always been nothing but a Jewish Communist Trojan horse.

National Socialism is the antidote to all of the problems and roadblocks that have been caused by the World Parasite.

National Socialism has been damned and denied by all modern official experts, governments, media, etc. National Socialism has been misunderstood by many, particularly by conservative and libertarian types and so-called center-rightists, as well as fans of popular Jewish films and fables.

Capitalism, Communism, and National Socialism

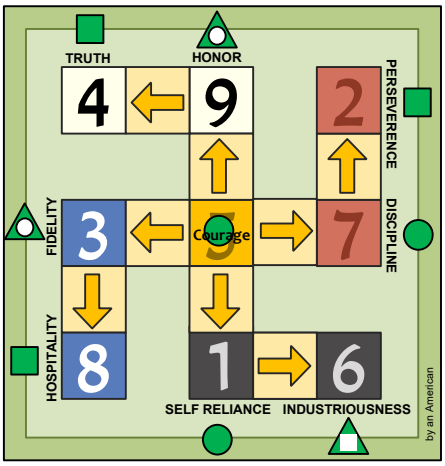


THE NINE VIRTUES

The Law of Three And the 3x3 Magic Square

by an American

PART V



Conservatives continually claim that NatSoc is "just like communism." Whether they really have "room temperature IQ's" or not, their minds "can only count up to Two," as G.I. Gurdjieff put it. So here's how you "count up to Three," boys and girls.

Read Thomas Sewell's words (page 16) and examine these diagrams. Then consider the following.

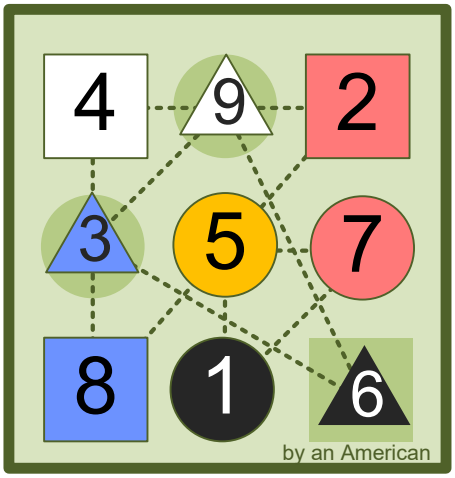
NatSoc subjects two elements from Capitalism and one element from Communism to a **"Chemical Reaction,"** producing something completely distinct, new, unlike either precursor. This is true on more than one level, but consider the level of The Nine Virtues, which comprise our "Behavioral Parts of Speech."

Honor and Fidelity are taken from Capitalism, and **Industriousness is taken from Communism**. The first two are Masculine, while the third one is Feminine. That's not to say that both men and women can't have or exercise all of the Nine Virtues, of course. And notice how in the four colored pairs, the two elements are gender-related to each other. Yes, men and women may be Self-Reliant. Both may be Industrious. But who is it that "works from sun to sun," and who is it who's "work is never done?" Who is more likely to practice Fidelity and who is more Hospitable?

Fidelity (male): faithful or loyal to God/s; to yourself and your beliefs; to your family; and to your friends.

Hospitality (female): Kindness in welcoming guests or refugees. You can tell just how important Fidelity is to the White Race by how much the swindling Jew insurance companies plug it!

Capitalism, Communism, and National Socialism

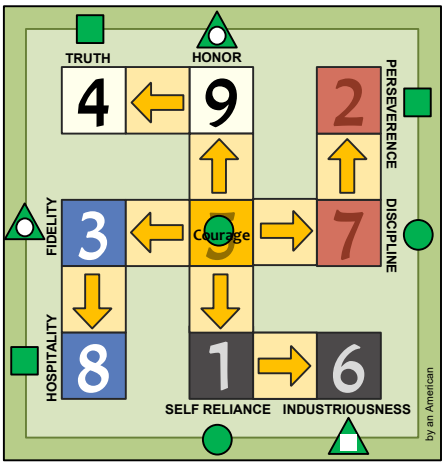


THE NINE VIRTUES

The Law of Three And the 3x3 Magic Square

by an American

PART VI



Consider Honor, Fidelity, and Industriousness – especially the latter, which NatSoc takes from the Reds. If it is such a wonderful virtue, why is it an essential part of Communism? Easy -- and this illustrates the concept that absent Courage, any other virtue leads to slavery. Communists are often extremely Industrious. At doing extremely bad things!

The Even-Virtue Right-Triangle bisects Courage. As a famous rabbi once confessed, "Half the Truth is a whole lie." In similar fashion, Communists are often fanatics about supporting what they feel is the Truth, but it's mostly false!
Hospitality? Are the Jews still giving <u>your</u> homeland away?

Let's look at Honor and Fidelity:
Race (ethnicity, family, heritage, genetics) is important. America worked pretty well as a nation state of White Europeans; clutter up the place with "others," and... just look around you!
This is why it's important to stress that National Socialism may be used to benefit any ethnic group or race, but the implementation and results won't be the same. Look at Israel; Zionism is definitely based upon National Socialism. Odd, how that pirate state embodies every horrible crime that the Jews accuse "Nazi Germany" of perpetrating! Jews lack the concept of Honor. Jews have over thirty synonyms for "swindle."

Fidelity speaks of our Folk. Honor is the "Energy" that drives the "Chemical Reaction." **As for Industriousness**, look at what the White Race has accomplished. Especially the Germanic or Teutonics! **Blood and Honor. Blood and Soil! End of story!**

Finally:

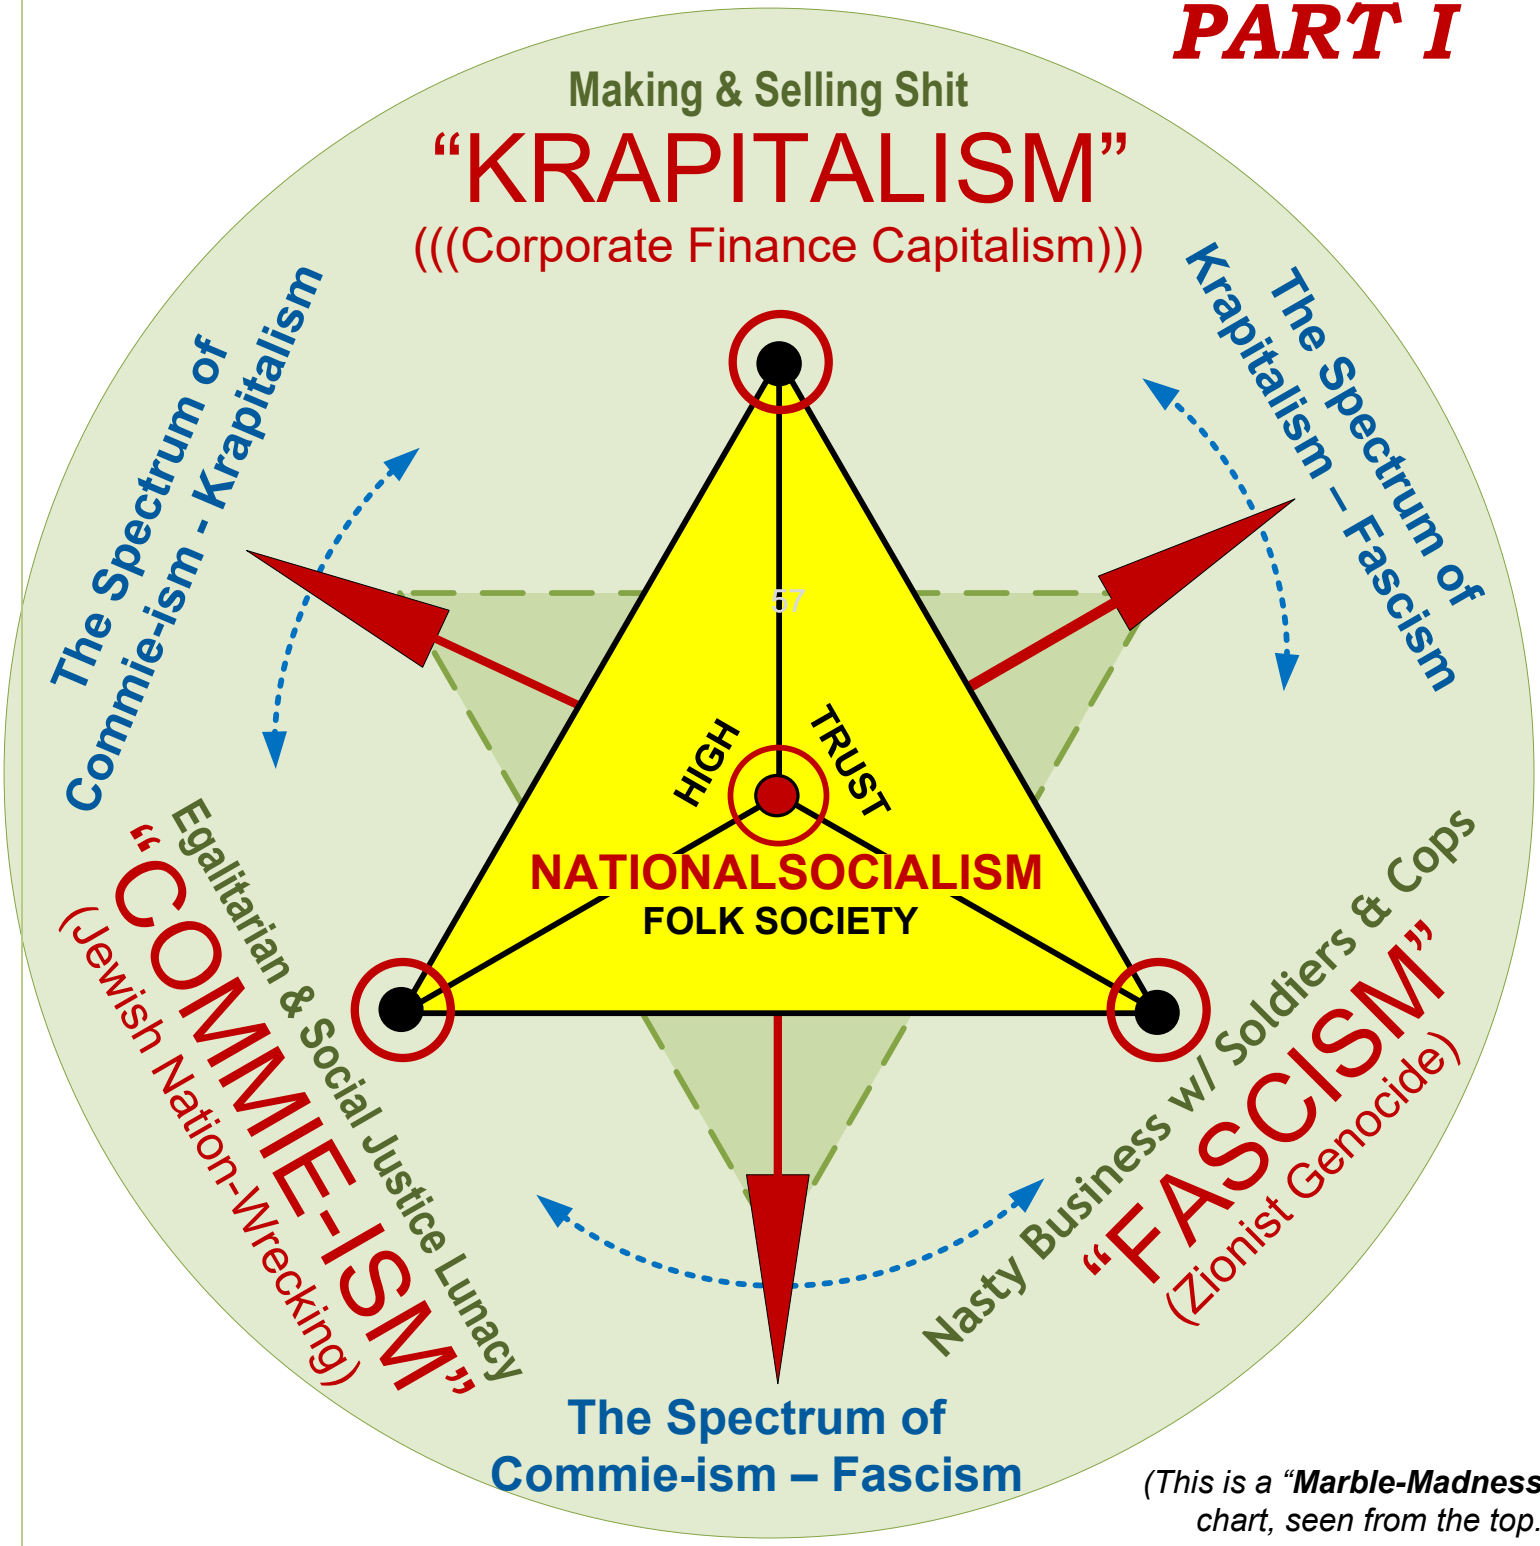
If you seek further "proof" regarding National Socialism, put this into your pipe and smoke it!

The Political Economic Tetrahedron[6]

Capitalism, Communism, National Socialism

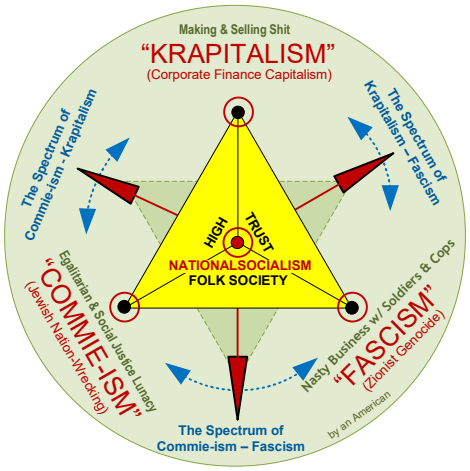
The Red Ball at the top of the Tetrahedron is as good as it gets. It is only possible in a Folkish, High-Trust Society, also known as ***Nationalsocialism.***

PART I



*(This is a "**Marble-Madness**" chart, seen from the top.)*

by an American



The Political Economic Tetrahedron

Capitalism, Communism, and NationalSocialism

by an American

PART II

Who in the struggle today has not been told that, "the Nazis were Socialists. Collectivism! Eek! National Socialists were just the same as Communists, except they hated Jews instead of Capitalists."

This bit of willful ignorance or misrepresentation is not easy to refute without knowing that while things have three "corners," four faces may be involved. Many will only see one face, and only two corners of that! Understanding The Law of Three -- or even presenting a well-constructed diagram -- will explain the situation to those who are not willfully ignorant or dishonest. Stupid people should be able to get it immediately.

You will see that it's also possible to "move on up" in this tetrahedron, reaching the high-trust Folk society that is necessary for the existence of a liveable, workable nation state or civilization.

For what it's worth, the term "Political-Economic" is a misnomer, because in a world of Triads, it only mentions two. Life consists of more than economy and politics. The top vertex with its big red dot shows that the missing third force is Folk (Volk) Society, e.g. pro-social-ism.

As it sits upon its triangular base, this tetrahedron's three lower vertices are given names with tongue-in-cheek, because at a low level, this is a real Clown World Cluster F*ck!

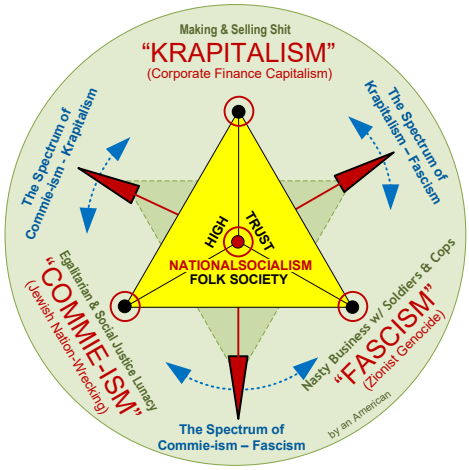
"Krapitalism": Making and Selling Shit (Please pardon the "French.")

TO READ THE CHART:
Consider this a three-dimensional "box," in the form of a Tetrahedron. The box is perfectly packed with marbles, with each marble representing a point somewhere between the values of the four vertices. Measured values may be touching any of the four faces, or they may be located towards the interior of the Tetrahedron.

"Commie-Ism": Egalitarian and Social Justice Lunacy.

"Fascism": Nasty Business with Soldiers and Cops.

At the low level, these titles really nail it because they each describe the negative essence of the mattoid mentalities that design, build, and operate these lop-sided cultures. Cultures they are, similar to what you would find if you looked beneath a greasy old refrigerator that hadn't been moved for cleaning for decades. Here are Lice as big as Rats; Rats as big as Bobcats -- each with a chain of liberal newspapers, "conservative" radio stations, or a "clinic" where babies are torn to pieces and naive preteen boys and girls are brainwashed into being separated from their primary and secondary sexual organs in exchange for all the money that insurance companies and government programs are willing to cough up for the Parasites.



The Political Economic Tetrahedron

Capitalism, Communism, and NationalSocialism

by an American

PART III

Move up the tetrahedron and reach the strata where a homogeneous Folk dwell and work, striving to attain their personal and family desires, but never foolish or self-centered enough to damage or distort their culture for short turn gain, for getting a leg up, or to please and placate alien swindlers and psychopathic criminals from tribes of mentally-disturbed self-chosen micro-managing, hypocritical paranoid schizophrenics -- when you reach that level in this tetrahedron, things rapidly shape up because the harmful parasites just described are never let into the homeland to begin with, or are quickly **put out with the "Katz,"** once their true natures are exposed and they are identified.

As you examine the Political/ Economic / Folk tetrahedron, you will notice three large red arrow dials, crossed by thinner blue-arc dotted lines that point towards the pairs of vertices at the bottom of the tetrahedron. These show and measure the "Spectrum" between what is described by naming each lower vertex.

- The **Spectrum** of Commie-ism/Krapitalism.
- The **Spectrum** of Krapitalism/Fascism.
- The **Spectrum** of Fascism/Commie-ism.

These details are the "night mare" of pedants, special boys, and bow-tied know-it-alls who like so many of their disciples and fan boys:

Think that Capitalism and Fascism are one and the same thing.

Believe that Communism cannot share similarities with Fascism. Or Capitalism!

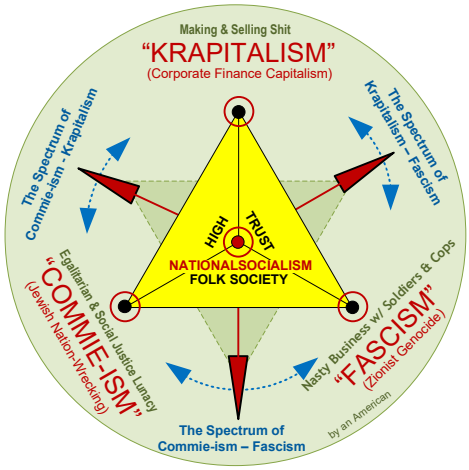
Can't Understand how, a "Third-Way," between Communism and Capitalism can exist, being not one or the other, but something unique, different and better.

What all of these detractors don't understand is that the things being described are not on the same level. The High Trust Folk Society a.k.a. National Socialism (or "Not-Anti-Social Socialism) is not just "between" Capitalism and Communism; it is also above them.

What the Folk add to this society, is a homogenous national/ethnic people, with characteristics very well described in the *Federalist Papers* (Number 2?), by John Jay (1745-1829): who was, among other things, an American patriot, statesman, diplomat, founding father, and the first Chief Justice of the Supreme Court ("SCOTUS") -- nominated by George Washington and confirmed by the Senate, John Jay was also an abolitionist.

Perhaps you attended a public school named for John Jay, White Man. Perhaps the school is now named for George Floyd.

Note: John Jay also claimed (stressed) that the jury is autorized to decide the law as well as the facts. Negro "Scholars" and "Joggers" ought to love him!



The Political Economic Tetrahedron

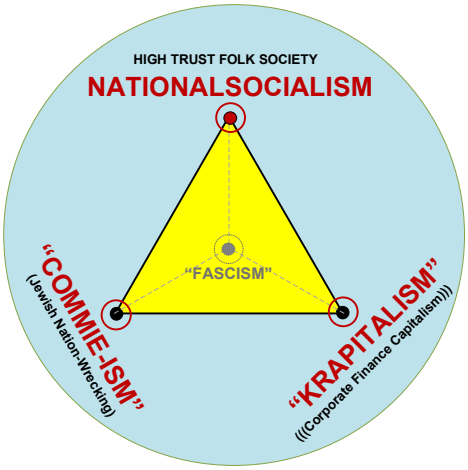
Capitalism, Communism, and NationalSocialism

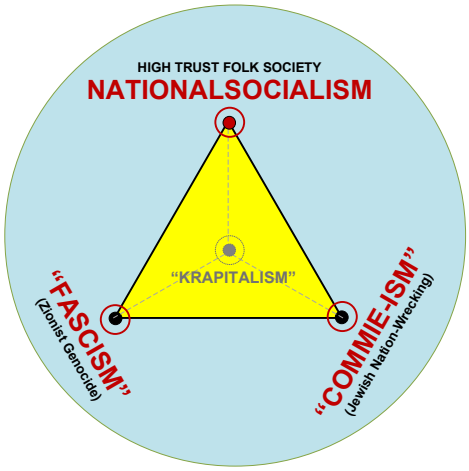
by an American

PART IV

BRAINBUILDER

A tetrahedron has four sides and four corners. But each side has three edges and the whole thing has six edges. What should you think about that!





You should think that since I have showed you one face-view of the Political, Economic, Folk Tetrahedron, then you need to examine it from the other three faces to see what you can find. No promises, but you ought to do just that. It's the Aryan thing to do. Rather like how you return the shopping cart to the grocery store, instead of leaving it out in the parking lot like certain other ethnics – or even stealing it, like yet other ethnics sometimes do.

You may zoom in on the small diagrams above to read the fine print and to compare them to each other and to the original, which is reproduced up top.

Print this page, even in black and white. Think hard and take notes because you might come up with something useful!

NOTE: Fascism* is included on this chart only as it is understood by the typical liberal, progressive, or communist – or by the typical nitwit conned-servative who uses it as a slur in his ad hominem against National Socialists and real Fascists. Leftoids, of course, use it as a slur for conservatives or anyone with whom they disagree or do not understand.

Thus, the "Fascism" that appears on this Tetrahedron is only really suitable for the initial, bottom (under the refrigerator) view. **Do not let that discourage you from taking part in this enlightening little exercise!**

*Admittedly, true Fascism is not precisely a synonym for National Socialism. You'll have to read about that elsewhere. Try Z-Library for a good head start!

(4) **Constructing an "official" Odd Number Magic Square**: Place '1' in the cell directly below the center cell. Continue diagonally, down and to the right, until you are blocked by an edge. Then imagine the flat grid curved into a tube. This may be horizontially or vertically, as needed. Continue, then, to the adjacent diagonal cell on the "opposite side of the tube." Continue down and to the right.

When blocked by a previously placed number, drop down to the second cell below, which may also carry you "around the tube." Continue the diagonal process of entering numbers. These two processes will carry you to the end with "no worries." The diagonal, top-down-to-right, should contain consecutive numbers. The final number will occupy the cell above the center. Note that Odd numbers are Male, hence building odd squares is quite straightforward. Even numbers are Female; building even squares is a more difficult proposition! See:

(5) **Nine Virtues Issues Dept**: Don't be gay and worry that The Nine Virtues are a Jew trick to substitute a replacement Ten Commandments and turn you into an Abrahamist slave!

These Nine Virtues constitute a "Behavioral Parts of Speech" that is genetically embedded into the White Race. No Jew goblin hopped out of a burning bush and gave it to us because we needed to learn to behave and stop being evil!

Besides, the so-called Ten Commandments of the Chicken Twirlers™ are a fraud because four of them are redundant ("bow down to the Volcano Demon") and most of the others deal with envy and covetousness or criminal behaviors that often accompany those negative states. So, you have "Three or Four Commandments," at best. Is the 1st commandment, "You shall have no other God before ***Me***" really a covert NLP order to behave as a self-centered, obnoxious, entitled, parasitic ass hole! Think about it!

(6) **The Political Economic Tetrahedron:**
Analogies, while useful, are not always perfect.
This Tetrahedron diagram models a sort of "Marble Machine Graph" or Dynamic Chart. Here's what to visualize while thinking about what can take place. **The Tetrahedron is perfectly filled with marbles,** so that a marble fits into each corner and marbles fill the interior, touching the corner marbles; touching the inside surfaces of the four faces; and touching each other throughout the interior. **Where marbles touch** there are tiny doorways, linking them so that a small "ant" may roam throughout. **As the "ant" moves** from marble to marble, the Red Needles of the three Dials move to reflect/reveal the its position relevant to the four corners. **Try to imagine this.** Does it work? Or not? **The three Needles are hinged** where they connect to the three edges of the lower face of the Tetrahedron, such that as the "ant" moves upwards toward the red dot of the top vertex (corner), the needles may fold upwards; when the "ant" occupies the top, Red corner, all three Needles rest against it's point. **Some racists claim** that the "ant" is actually a cockroach when it is on the lowest layer of marbles, but if it moves upwards, it may "Evolve." **When it occupies the marble in the top, Red corner**, it "Evolves" into a blond, blue-eyed Aryan. Not everybody believes this, however. **What do you think? Why?**

Footnotes

(#) **MetaFootnote:**
For those who have worked their way through this booklet and are confused, here's the deal. Forget about "conspiracies," but pay attention to "business as usual," because successful business men have desires and they make plans, which being successful men, they are able carry out. This has been going on since the days of ancient Sumer, where the guilds of the Merchants and Moneylenders first arose and began practicing usury, later adding compound interest. Such men still rule your world today; they are more responsible for who and what you are, than you might like to think!
Intelligence is the ability to recognize patterns. An intelligent population, capable of thought, is not in their plans! Hence, your early dumbing down at the government run schools.
Intelligence may be recovered, but it takes three things: desire, practice, and (of course) the right things to think about – if you have questions about the latter, please see the back bookcover.

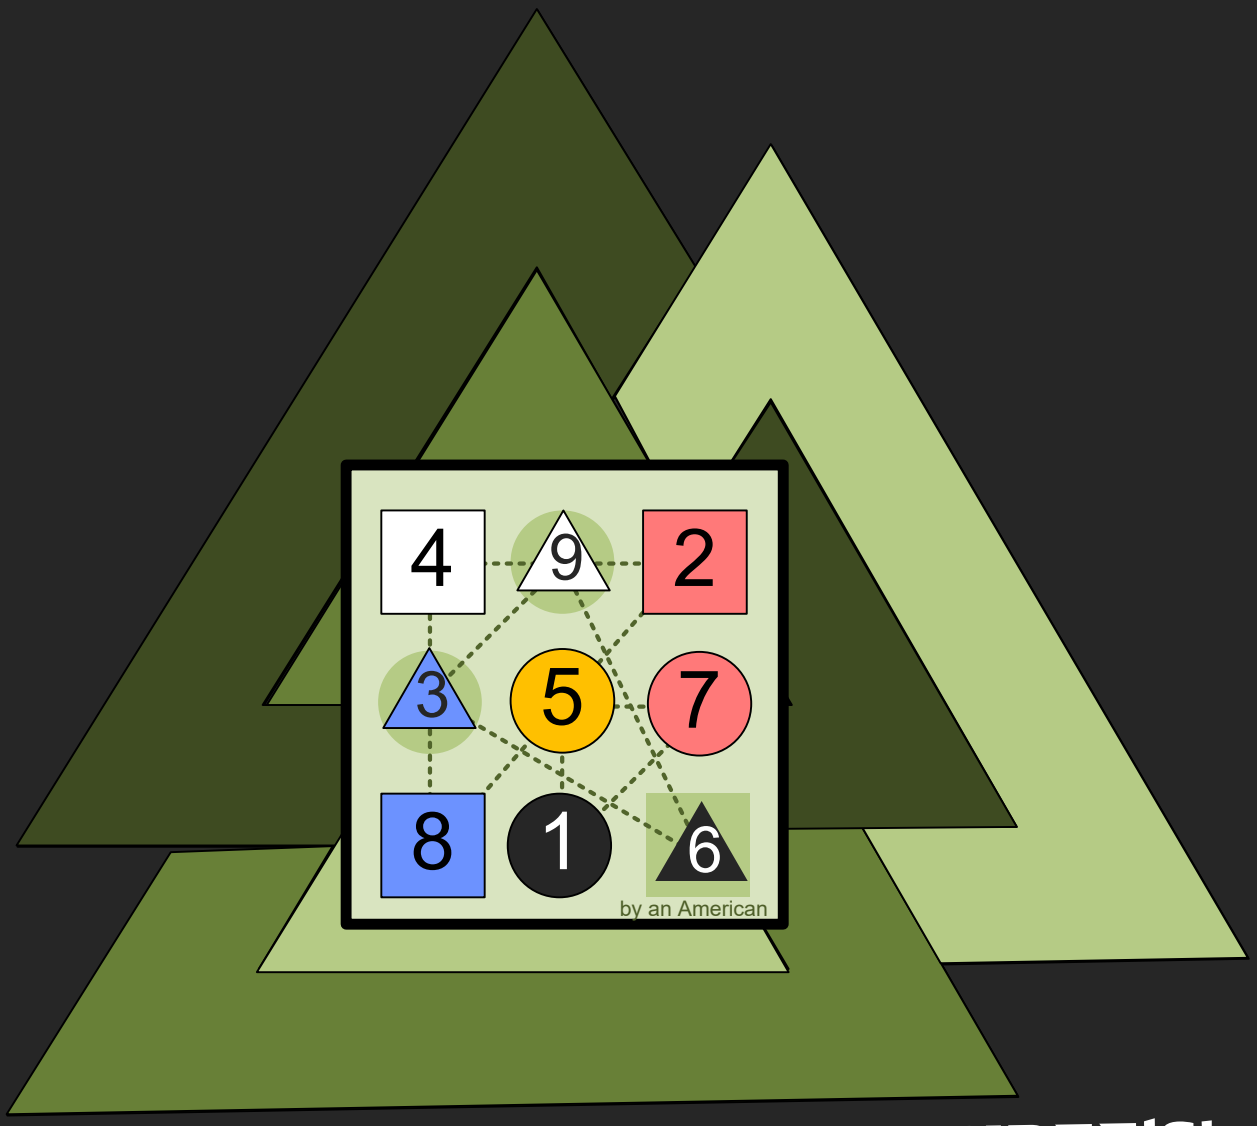
NINE?

THEN WHY CALL IT “THE LAW OF THREE?”



BECAUSE NINE IS THREE THREE’S!

"In the late nineteenth century, it was becoming public knowledge that the properties of numbers in this physical realm are based upon nine different vibrations, hence ordered from one to nine."

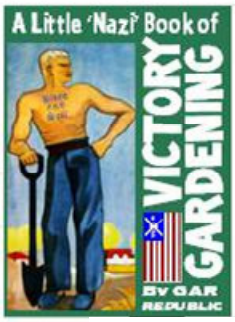
THE LAW OF THREE

A lavishly illustrated, definitive introduction to The Law of Three. More than 300 pages!

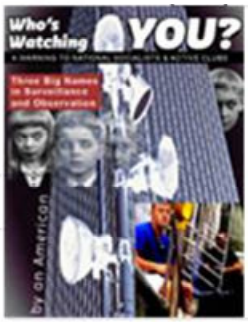


A LITTLE "NAZI" BOOK OF VICTORY GARDENING

Many folks garden. There are many "gardening" books.
Why reinvent the wheel? This book is filled with information and real-life tested techniques that will "supercharge" what's in all the other books, and the material online as well. Link it all together for Victory! Great for activists and local groups!

NATIONAL SOCIALISM IN ANCIENT SRI LANKA

Call it "The Original Permaculture." This old, incredibly huge and complex system was assembled over the ages in Ceylon. Relevant because it "made the farmer an important member of the Nation." Some people didn't approve.



WHO'S WATCHING YOU? A WARNING FOR NATIONAL SOCIALISTS AND ACTIVE CLUBS

What do you suppose all the wealth that You Know Who has swindled away over the centuries has been used for?
This huge "GLOBAL" Stasi system dates from the Akkadian Empire. At least!
